

## Power Attenuator

# P-ATT

### Features:

P-ATT is using as an attenuator, or load-matching, and allows your tube amplifier to operate at a high output level where it will perform the best sound. The recommended for input power up to around 80 Watts. It has some useful features, making it an excellent tool for both live and recording. P-ATT can be used effectively in rehearsal, live show, and studio recording , to deliver great sound and tone where loud volume is unnecessary . And the inclusion of MicSim circuit adds the convenience of a speaker-like output without the need of a speaker cabinet or microphone.
